Recommendation Letter

I write this letter of recommendation, on behalf of Mr. Husnain Ali, with great pleasure. I have spent almost two years now as Husnain's Mathematics teacher and observing his skills in all endeavours.

Husnain is among the most unique students that I've ever taught. His wide skillset, engaging both the right and the left side of the brain, is something we rarely come to see. More importantly, he possesses humbleness and eagerness in character, the hallmarks of a student.

When it comes to logical thinking, Husnain displays utter brilliance. He desires not only to know the direct answers to questions, but to understand the processes and the reasons behind them: for which he poses different methods to study and learn, and is triumphant in doing so.

In fact, I once recall his proposition to teach the class by himself and solve the questions together, without any help. As a result, he led the entire class in solving the questions remarkably well: also making his leadership qualities quite discernible.

His adept nature is further made perceivable by the fact that he got an A in Additional Mathematics in GCSE, O level, which is quite a tough subject to manage for most O level students; and of course, an A* in Mathematics. He handles derivatives and integration like child's play; therefore, scoring an A in AS Level was no big deal for him, and he continues surprising me in A2. He shows a great desire for Aero-Space Engineering and performs calculations exceptionally well, with only minor mistakes which are, in fact, very rare to see from him.

When it comes to his right-brain: Husnain is known all over the Northern Campuses for his exceptional music skills, which have been famous long before I started teaching him. Each year he does something different and leaves everyone amazed.

Furthermore, Husnain manages this all this whilst compromising his grades. He has 8 As in O Level and 3 As in AS Level, and a brilliantly consistent performance in his class. How developed a brain must be to deal with such a variety in ventures.

Lastly, his character and conduct are ideal. He brings himself to school with a humble and learning approach. He greets everyone with a positive attitude, and doesn't waste time at all. You would either find him practicing questions or playing the guitar; adding to his skillset at all times.

I am confident that Husnain would be the perfect candidate and a most excellent addition to your College Program. I give Husnain my unreserved and highest recommendation. For any further information you would like from me, you may contact me.

Sincerely

Recommendation Letter

It is with great honor that I write this letter of recommendation for a dear student of mine, Husnain Ali. As his physics teacher, I've come to note several qualities in Husnain, that are unlike any other student that I have taught before. He is definitely among the top students that I have ever taught.

First and foremost, his attitude towards learning.

Husnain is a keen and fervid young man, with a great insight. The velocity with which he learns and adapts different concepts and ideas is remarkable, and pure interest can be seen in his approach towards aero-space engineering. Due to this attitude of his, it is no surprise that he has an A* in O Level Physics, and an A in AS Level. He continues with zeal and zest in his A Levels, and promises us great results. His performance is noteworthy.

Secondly, leadership skills.

I have noticed something quite interesting in Husnain, which is the way he handles younger students. He talks with such gentleness and a loving tone, that every student seems to love approaching him and conversing with him. Similarly, he greets everyone upon confrontation with a big smile and this has resulted in everyone taking the initiative in greeting him upon meeting him. These very qualities make him an exemplary student and a potential leader.

Lastly and most importantly, versatility.

Husnain's abilities are truly unique. Along with being adept at calculations and understanding theories, he is a musical genius. He learned how to play the guitar like a professional, just within 2 months. Along with that, he integrates his singing, beatboxing and rapping, skills which he is well known for, with his guitar playing, which sounds absolutely amazing. I am no musical genius, but it is easy to say that the level of intricacy he can manage is way above than that of an average musician. Him receiving praise from amazing artists alone is the proof for that.

I give Husnain my recommendation without any restraints, and am positive that he would be the perfect match for your College Program.

Sincerely
